GP = individual games played; W/L = game wins/losses. Both championship games count; byes do not.

PF/PA = points for/against; Diff. = PF - PA; Net/GP = average point differential per game.

Pts % = PF / (PF + PA). All points include pool, bracket and placement play.

Teams played different numbers of games and different opponents; averages do not adjust for opponent strength.

Pool, Bracket and Place W-L count individual games. Bracket includes the championship; Place means placement games.

Match W-L counts the championship series as one match. A 0-0 stage record means no games in that stage.

Close = final margin of 2 or 3 points. Extended = both teams reached at least 20; a final double alone does not qualify.

Checks passed: game wins = losses = 53; match wins = losses = 52; total points for = total points against.

SRS = Net/GP + Schedule. Schedule is opponents' average SRS, counting each game; higher means tougher opposition.

Least-squares margin ratings; team average = 0. All games weighted equally; no margin cap or seed inputs.

SRS estimates points/game above an average team. Small samples and large margins affect ratings; official places are unchanged.
